| C | Height | 200 |

- It is supplied with a blank plate to which the specific coupling, depending on the machine, can be attached.

The new adaptor plate M3 can be attached to any equipment with skid steer loader attachment even on other operating machines.

In a quick and easy way, any equipment can be moved from the skid loader to the excavator rather than to the telescopic or to a backhoe. The best solution for a fast exchange making your job easier. It is equipped with welded attachment for loaders / backhoe / telescopic loaders or with bolted counterplate on which the excavator hooks can be welded.
